

ResponseWare Release Notes

Software Name: ResponseWare
Release Date: 8-01-08
Version: 1.0.8213
Support: support@turningtechnologies.com
Overview:

Minimum Desktop System Requirements:

- An internet connection
- A web browser that supports AJAX, JavaScript™ and HTTP requests such as:
- Internet Explorer® 7 or higher
- Firefox® 2 or higher
- Opera™ 9 or higher
- Netscape® 8 or higher
- Safari® 3 or higher

Warning

If you do not have an unlimited data plan, you may be charged for connectivity by your cellular provider.

Turning Technologies LLC is not responsible for any cell phone usage charges.

Minimum Mobile System Requirements:

- Wi-Fi or cellular connection (for optimum performance, a Wi-Fi connection is recommended). Local area Wi-Fi or cellular network capable of supporting a concentration of one simultaneous connection for each ResponseWare device located in the same coverage area on the network. *eg: If a presenter wants to use 100 ResponseWare devices, their network needs to be able to support 100 simultaneous Wi-Fi connections within the area the devices are being used. The difference in a network that can support ResponseWare and a typical Wi-Fi network is that in typical use, all 100 devices are not in the same location or using the network at the exact same time.*

Device Bandwidth Requirements

1.6kbps downstream
 4.3kbps upstream

Bandwidth Recommendations

Number of Users on Network	Required Available Network Bandwidth Up and Downstream (bps)
1	9600
2 - 30	128k
31 - 100	512k
101 - 350	T1 or better

1.0.8213
