

ExamView (PC) Release Notes

Software Name: ExamView
Version: 11
Release Date: 03/01/2017
Support: support@turningtechnologies.com
Language: English

Minimum System Requirements:

- Microsoft Windows 7, 8 and 10 (32- or 64-bit)
- Intel® Pentium® dual-core processor, 2 GHz or higher (or equivalent)
- 2GB RAM
- 500 MB hard disk space
- Monitor capable of displaying 1024 x 768 or higher resolution
- An active internet connection (to connect to a Turning Technologies account, to access online Help, to use ExamView Premium subscription features, and to utilize the content update feature for selected publishers' content)
- Device Manager v7.7.0.5 (for use with QT2, QT, NXT, Pulse/Spark, CPS Gen2, CPS IR)
 - NOTE: You do not need Device Manager to use Spark 360/Pulse 360 clickers with ExamView v11.

v11

- Update - Implemented a perpetual license requiring a Turning Technologies account for authentication
- New Feature - Added ExamView Premium, a subscription-based upgrade to ExamView v11
- New Feature - Integrated ExamView Premium features:
 - Added the Publish to ExamView online testing service wizard to publish an online test (Test Generator)
 - Added the ability to create an online assignment, get results from the online testing service and to manage online tests on the website (Test Manager)
 - Added the ability to get results from response devices using ExamView student apps and manage session settings (Test Manager)
- New Feature - Implemented multiple ExamView apps for students to respond to published online tests and to join a polling session using web-enabled technology (i.e., iPhone, Android phone, iPad, Android tablet, PC, Mac, Chromebook, and Web)
- Update - Implemented enhanced user interface
- Update - Added over 110 new Style Gallery templates to automatically format tests
- Update - Expanded the list of dictionaries to spell check content including American English, British English, Canadian English, French, German, Italian, Spanish, Legal, Medical, and Technical

- New - Implemented expanded student response device support for polling sessions including Turning Technologies' clickers (QT2, QT, NXT, Pulse/Spark 360, Pulse/Spark, CPS Gen2, CPS IR), ExamView student apps, or a mixed response device environment
- New - Added troubleshooting tips to set up a polling session and to work with Device Manager
- New - Added native LMS integrations to support
 - Blackboard Learn 9.1
 - Brightspace by D2L
 - Canvas
 - Moodle 3.1.2
 - Sakai
 - Schoology
- Update - Added new Sample banks
- Update - Online Help support
- Update - Added abbreviated user guides
- Minor bug fixes and improvements
 - Removed ExamView Cloud link
 - Updated Knovation's netTrekker integration allowing users with a netTrekker account to immediately link to related teaching resources
 - Changed LAN default setting to "Limit access to students in a particular class"
 - Fixed bug to schedule LAN tests for dates/times not past
 - Fixed bug to format Multiple Response questions for use with Import Utility (PC)
