

ResponseWare for Android Release Notes

Software Name: ResponseWare for Android Devices
Release Date: 03/06/17
Version: 2.7.0
Support: support@turningtechnologies.com
Language: English
Overview:

Minimum System Requirements:

- Android device with Android OS 4.1 or higher
- Wi-Fi connection (recommended for optimal performance) or data connection

Warning

If you do not have an unlimited data plan, you may be charged for connectivity by your cell phone provider. Turning Technologies is not responsible for any cell phone usage.

Important

Bandwidth usage below is only an AVERAGE ESTIMATE based on multiple choice questions with 5 answer choices.

Anywhere Polling (no images)	1.5 KB/participant
PowerPoint PC	104.09 KB – 210.02 KB/participant
PowerPoint Mac	58.57 KB – 118.16 KB/participant

Note

Presenters must have TurningPoint v5 or above installed and ResponseWare enabled.

2.7.0

- Added notification to inform users of future branding changes and upcoming enhancements
- Updated launch icon

2.6.1

- Fixed an issue which caused numeric response questions to add a decimal instead of a common for responses over four characters

2.6.0

- Self-Paced Polling support for edited response storage
- Stores response if user navigates away from question without submitting response
- Stores submitted response and revised response if un-submitted

- Icons added for edited response storage to carousel, question list and un-answered question display:
 - Edited, but un-submitted response – Carousel will show white with solid bottom corner
 - Submitted response with edited answer – Carousel shows filled in green square with bottom corner filled icon
- Updated icon for *Send* and *Reset* buttons

2.5.0

- Localized to support 12 languages:
 - Arabic, Chinese, Danish, Dutch, English, French, German, Italian, Japanese, Russian, Spanish, Swedish

2.4.0

- Added ability to keep users logged in between launches

2.3.0

- Improved stability of the connection with the ResponseWare server

2.2.0

- Added Instructor led Self-Paced Mode
 - Ability to view all questions in the test in a list view
 - Ability to swipe through questions in the carousel
 - Participant has the ability to submit the test upon completion
 - Added ability for the client to send a heartbeat to the server to ensure there is still a connection
 - Enhanced Content Upload
 - Ability to assign test versions to each device
 - Ability for the client/host to recover a session/test when a connection is dropped
- Single Sign-On Authentication
- Enhanced background communications to increase performance and decrease disconnections

2.1.0

- Android OS 5.0 Support
- New menu available for added presentation navigation
- Support for updated ResponseWare server 2.1.0, adding enhanced background communications to increase performance and decrease disconnections
- Added HTML question content to send to participants in low bandwidth cases where images may take longer to load

2.0.3.12

- Resolved issues causing the application to close unexpectedly
- Removed support for Android versions 4.0 – 4.0.4; users can still access ResponseWare from the Chrome browser

2.0.2.9

- Resolved session connection issues
- Resolved issues causing the app to crash

2.0.1.2

- Improved security and stability of the app.

2.0.0

- **Initial Release**
